GitHub par naya Lecture aur naya PDF add karne ki guide

Zaroori baat

Lecture aur PDF dono sirf **data.js** file me add hote hain. Baaki pages (lectures, watch, material, search) khud update ho jate hain.

Part 1: Naya lecture add karna

- 1 **YouTube video ID nikalo.** Link `https://youtu.be/AbCdEfGhIjK?si=...` jaisa hota hai. `youtu.be/` ke baad ke 11 character hi ID hain. `watch?v=` wale link me `v=` ke baad ke 11 character.
- 2 **GitHub me data.js kholo.** Repo me `data.js` par click karo, phir upar-right me Edit (pencil) icon dabao.
- 3 **Sahi jagah dhundo.** Ctrl+F karke `"id": "ode-16"` dhundo (Real Analysis ke liye `"id": "ra-09"`). Naya lecture usi subject ke aakhri lecture ke theek baad aana chahiye, kyunki lectures usi order me dikhte hain jaise wahan likhe hain.
- 4 **Naya block paste karo.** Us entry ke closing `}` ke baad comma lagao, aur uske neeche ye daalo:

```
{
  "id": "ode-17",
  "s": "ode",
  "n": "L-17",
  "t": "Lecture ka title",
  "k": "T",
  "yt": "AbCdEfGhIjK"
}
```

- **id:** unique hona chahiye (ode-17, ode-18... ya ra-10...).
- **s:** subject, ode ya ra.
- **n:** dikhne wala number, jaise L-17.
- **k:** "T" Theory ke liye, "P" Practice ke liye.
- **yt:** step 1 wali 11 character ID.

5. **Commit karo.** Upar-right me green "Commit changes" dabao, phir dobara "Commit changes".

Part 2: Naya PDF add karna

- 1 **PDF Google Drive me upload karo.** PDF par right-click, Share, "General access" me **Anyone with the link**, role **Viewer** chuno. Ye na kiya to students ko PDF nahi khulegi.
- 2 **Link copy karo.** Link aisa hoga:
`https://drive.google.com/file/d/1AbC...xyz/view?usp=sharing`. `/d/` aur `/view` ke beech ka lamba hissa file ID hai.
- 3 **data.js me jao.** Edit dabao, Ctrl+F karke `"id": "m11"` dhundo (ye abhi ki aakhri PDF hai).
- 4 **Naya block paste karo.** Us entry ke closing `}` ke baad comma lagao aur ye daalo:

```
{
  "id": "m12",
  "t": "PDF ka title",
  "d": "Chhota description",
  "k": "Notes",
  "s": "ra",
  "drive": "FILE_ID_YAHAN"
}
```

}

- **id:** unique (m12, m13...).
- **k:** "Notes", "PYQ" ya "Practice".
- **s:** ode ya ra.

5. **Commit karo**, upar jaisa.

Commit ke baad

- 1-2 minute baad repo ke Actions tab me hara tick dekho.
- Site ko Ctrl+F5 se ya incognito me kholo. Naya lecture ya PDF aa jayega.
- Search me bhi apne aap aa jata hai.

In galtiyan se bacho

- **Comma:** do blocks ke beech comma zaroori hai. Comma chhoot gaya to poori site ka content gayab ho sakta hai. Aisa ho to repo me History kholo, aakhri commit ke aage teen dots par Revert dabao, aur sab pehle jaisa ho jayega.
- **Quotes:** title me double quote mat lagao. Zarurat ho to single quote use karo.
- **Duplicate id:** ek hi id do baar nahi honi chahiye.
- **Naya subject:** data.js me uske subject ke saamne "Live": true likho, aur lectures me wahi s id use karo (jaise alg).
- **Home ke numbers:** home page ka "16+ ODE Lectures" wala number index.html me likha hua hai, wo apne aap nahi badlega.
